# 1. Preface

Thanks for using the KG300 switch device. Reading this manual carefully can help you understand the function and features of this device, and quickly master the use and installation of the device.

## 1.1. Product introduction

KG300 device is a switch product specially developed for the access control field. It provides relay interface and supports delay setting.

## 1.2. Product features

- 1, Output relay signal.
- 2, Support door opening delay.
- 3, Button status indicator.
- 4, White, black and gold colors.
- 5, Capacitive touch switch, tempered glass panel.

## 2. Product appearance

### 2.1. Overall introduction

- 1, Touch area
- 2, White standby indicator
- 3, Green key indicator

2.1 Front view

Wiring interface

Dialing keyboard:

- 1:Delay 3 seconds
- 2:Delay 6 seconds
- 3:Set to turn on the long press effect

TIPS:

- 1:Close 1, 2 and 3, no delay effect
- 2:Open 1, close 2 and 3, delay 3S
- 3:Open 2, close 1 and 3, delay 6S
- 4:Open 1 and 2, close 3, delay 9S
- 5:Open 3, close 1 and 2, the effect of short press is determined by the first two digits of dial code, that is, short press without delay, long press 10s relay and green light on, and then long press 10s relay and green light off.

## 2.2. Product size chart

Front view

Side view

Side view

Back view

### 3. Product parameters

Product parameters	
Switch mode	Capacitive trigger mode
Touch area	15mm diameter
Size	88.2*88.2*28.7mm
Switching time	Optional: real time, 3, 6, 9 seconds
Support interface	Relay
Data wire	PH2.0-6Y
Indicate	LED white, LED green
Working current	12V(0.027A) (Rated voltage 12V~24V)
Installation method	86 box installation

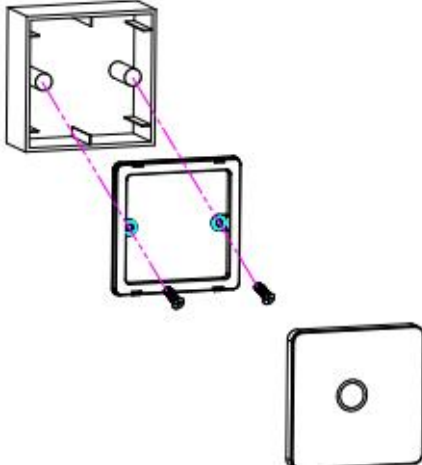

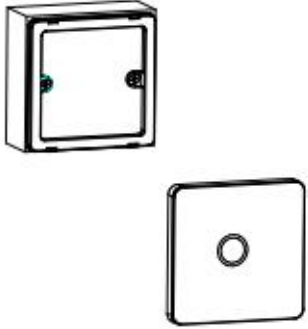

## 4. Interface definition

Pin#	Function description
Pin1	GPIO (Temporarily not supported)
Pin2	COM
Pin3	NC
Pin4	NO
Pin5	VCC
Pin6	GND

## 5. Installation method

 <p>A perspective view of the KG300 product, a square device with a circular hole in the center. A small triangle points to the hole, and the text '16.00FL' is written below it.</p>	 <p>A diagram showing a square bracket being aligned with an 86 box. Two screws are shown passing through the bracket into the box. A separate view of the bracket is shown below.</p>	 <p>A diagram showing the square bracket being secured to the 86 box with two screws. One screw is already partially inserted, and the second is being added.</p>	 <p>A diagram showing the KG300 product mounted on the square bracket, which is now fixed to the 86 box.</p>
<p>Step 1 : Confirm that the removal hole is downward.</p>	<p>Step 2 : Fix the bracket to the 86 box.</p>	<p>Step 3 : Lock the bracket with two M4 * 20 cross countersunk head screws.</p>	<p>Step 4 : Fix the product to the bracket.</p>

## 6. Access control scenario application

### 6.1. Scene diagram

## 6.2. Access control system wiring diagram

## 7. Notes

- 1, The device standard is 12-24V power supply, which can be taken from the access control power supply or supplied separately. High voltage may cause the device to fail to work normally or even damage the device.
- 2, Do not disassemble the device without permission, otherwise the device may be damaged.
- 3, Device wiring shall be firm and reliable. Insulation shall be ensured between lines to prevent short circuit from burning device.
- 4, KG300 outputs relay signals. In the access control scenario, it can be connected to the original access control system according to the normally open or normally closed connection method of the original access control system.

## 8. Contact

Company name: Beijing Vguang Internet Technology Co., Ltd.

Address: China Meteorological Science and Technology Park, No.2, Zhenxing Road, Changping District, Beijing, China.

Hot line: 400-810-2019
